Education

North Carolina A&T State University

Dec 2025

Bachelor of Information Technology

Certifications: Stellar Cyber Certified Associate (SIEM) (May 2024) | Junior Penetration Tester (PT1) (August 2026)

Experience

Eli Lilly & Co.

Feb 2026 – Present

Cybersecurity Engineer — Cyber Threat Mitigations

Indianapolis, IN

- Conducted enterprise-wide RMM security assessment encompassing attack surface enumeration, threat actor TTP mapping, and MITRE ATT&CK-aligned compensating control recommendations – driving a risk-informed decision on approved tooling and associated control requirements across the enterprise environment.
- Engineered a repeatable Axonius query framework to detect and track 48 categories of prohibited software (C2 frameworks, EDR bypass tooling, exploit dev, browser data aggregation) across the enterprise asset inventory – **reducing a 4-person, 1-2 day collection and reporting cycle to a single-analyst workflow** completed in approximately 20 minutes.
- Built a Claude Skill integrated with the **Azure DevOps connector** to automatically pull security mitigation plan tasks and cross-reference them against artifacts of evidence, **reducing manual verification effort by 90%** and eliminating false-positive closures across 27 mitigation plans.

CampusCore

Jul 2024 – Jan 2026

Azure Network Security Architect

Remote

- Engineered zero-trust cloud infrastructure in Terraform, codifying Defender for Cloud Standard across 7 resource types with malware scanning, sensitive data discovery, and ACR vulnerability scanning; **establishing defense-in-depth threat detection** across a **4-subnet** segmented network enforced by **15+ least-privilege NSG rules**.
- Eliminated public attack surface by automating storage hardening via Terraform; **instrumented Postgres, ACA, ACR, and blob diagnostic pipelines** into **Log Analytics**; replaced deprecated NSG flow logs with VNet flow logs and provisioned Network Watcher.
- Architected **VPN P2S** gateway with certificate-based mutual auth and private DNS integration for zero-trust remote access; codified database and private endpoint NSG segmentation in **Terraform**.

Eli Lilly & Co.

May 2025 – Aug 2025

Security Architecture & Engineering

Indianapolis, IN

- Automated **ASPM** (Checkmarx One) and **CSPM** (Wiz) workflows, slashing manual review cycles and accelerating threat triage.
- Developed **architectural security triage** script, **surfacing misconfigurations** while equipping architects with enhanced risk intel.
- Partnered with Software Engineers and Business Units to **integrate security requirements into SDLC workflows**, balancing risk mitigation with operational efficiency.

Leadership Experience

Student-Led Cybersecurity Course, NCAT Center of Excellence in Cybersecurity

Aug 2025 – Present

Founder & Lead Instructor

Greensboro, NC

- Established strategic partnerships with **Camelot Secure, ACM, and university tech boards** to institutionalize cybersecurity curriculum, coordinate competitive **CTF** events, and secure industry internship pathways, elevating NCAT's national recognition in cybersecurity education and attracting **100+** students across disciplines in inaugural semester.

Technical Skills

Cloud & Infrastructure: Azure (Defender, VNets, NSGs, Key Vault, Private Endpoints), Terraform, Zero-Trust Architecture, Network Security Engineering, Git, GitHub Actions

Security Tools & Methodologies: STRIDE, PASTA, DREAD, SIEM (Stellar Cyber), ASPM (Checkmarx One), CSPM (Wiz), Kali Linux, OSINT, Axonius, Seemply, CrowdStrike Falcon

Compliance & Automation: NIST 800-53/800-61r2, FERPA, SOC 2, Python, Bash, Security Process Automation, Power Automate

Offensive Security: Cyber Threat Intel, Risk Assessment, Vulnerability Assessment, Attack Path Mapping, Manual Penetration Testing (Web App, Network, Active Directory)
